

KANHAIYA KUMAR SINGH

Full Stack Developer (MERN) • Backend Developer • Software Developer Intern

Jharkhand, India | 9142417247 | skanahaiya05@gmail.com

Portfolio: kanhaiyasingh-portfolio.vercel.app | LinkedIn: linkedin.com/in/kanhaiya-singh-78a8b72a5

Professional Summary

Full Stack Developer skilled in **MERN stack**, **REST API** architecture, and **backend engineering**. Strong foundation in **DSA**, **OOP**, **DBMS**, **Computer Networks**, and **Operating Systems** — core competencies aligned with **Software Engineer** roles. Proven track record of independently architecting and shipping full-stack applications from **backend API design** to live **cloud deployment**.

Education

Bachelor of Technology in Information Technology

Haldia Institute of Technology, West Bengal, India | 2023–2027 | CGPA: 7.5/10

Senior Secondary (Class XII – CBSE)

Percentage: 80% | 2021–2022

Secondary (Class X – CBSE)

Percentage: 89.2% | 2019–2020

Technical Skills

- **Languages:** Java, JavaScript, C
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, JWT, bcrypt
- **Database:** MongoDB, SQL
- **Tools:** Git, GitHub, Postman, VS Code
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, MVC Architecture

Projects

ElderGuard AI — Elderly Health Monitoring System | React.js, FastAPI, MediaPipe, REST APIs (2024)

- Engineered a React.js dashboard to visualize real-time heart rate and SpO₂ metrics, integrated with FastAPI backend via REST APIs and WebSocket for live data push.
- Architected UI modules for active alerts, 24-hour vitals trend charts, medicine schedule, and emergency contact management.
- Integrated FastAPI REST endpoints into React frontend enabling real-time communication across monitoring, alert, and notification modules.
- Interfaced with 10+ FastAPI endpoints for health data pipeline, ensuring reliable data flow between AI processing modules and React dashboard.

Recipe Hub — Recipe Sharing Platform | React.js, Node.js, Express.js, MongoDB | myrecipehub.vercel.app (2024)

- Architected a scalable full-stack application using MERN stack with 8+ RESTful API endpoints supporting complete CRUD operations for recipe management and admin controls.
- Implemented robust JWT-based authentication and bcrypt password hashing for secure registration, login, and session persistence with 7-day token expiry.
- Engineered centralized state management across authReducer, recipeReducer, and userReducer with PrivateRoute-based protected client routing in React.
- Deployed frontend on Vercel and backend on Render integrated with MongoDB Atlas — achieving 100% live production availability with cloud database persistence.

Certifications & Achievements

NPTEL Programming in Java – IIT Kharagpur (Elite + Gold)

- Achieved a perfect score of 100/100, demonstrating strong command over Java programming, Object-Oriented Programming, and problem-solving concepts.

AI For Everyone Hackathon

- Won Best AI Systematic Solution Award and People's Choice Award for ElderGuard AI — competing against 70+ teams.
- Led frontend development and FastAPI integration; team awarded ₹10,000 prize for an innovative AI-powered elderly healthcare monitoring solution.
